Niagara 2296

Modular External Fiber & Copper Bypass for Gigabit Ethernet & Fiber Channel

Niagara 2296 is a modular external Fiber & Copper Bypass unit for Gigabit Ethernet & Fiber Channel.

Niagara 2296 supports up to four segments. The four segments could be a combination of Copper, single mode fiber or multi Mode fiber.

Modular design provides easy field upgrade from one segment to four segments.

Niagara 2296 is designed with a built-in bypass circuit to provide maximum up time for the network.

Niagara 2296 protects the network up time by removing the failed server off line without any interruption to data traffic.

Features

➤ **Supports 10G fiber**

- Supports 10/100/1000 base , TX, SX, LX
- Supports *Fiber Channel*.
- No power supply is require
- Programmable heartbeat interval
- Front panel provides easy installation for 19 inch rack

Dimension:

Length, 462 mm
Width, 37.8 mm
Height, 40.65 mm
